To Whom it May Concern:

On behalf of Brescia University College, I am happy to offer this letter of recommendation for Hayman Construction Inc.

We worked with Hayman Construction from April 2012 to Aug 2013 on the construction of our fabulous new residence, Clare Hall, and its adjoining dining pavilion, The Mercato, which has met with local, regional, and provincial acclaim.

Brescia was able to remain open throughout the project, thanks to Hayman workers, who worked very well with staff and students, accommodating essential needs to ensure that as little impact as possible was felt by all of us.

We felt that it was essential to communicate on a bi-weekly basis with our various audiences about the progress of the build and Hayman helped us immeasurably with those communiqués.

Hayman maintained a competent superintendent, who was onsite to oversee the work, and who solved shortcomings and or problems that were brought to his attention.

Pricing was competitive when compared to other similar projects in our region but most importantly Hayman took ownership of the job from beginning to end. The building opened on time, despite the disruption of an elevator installer strike.

We have been very happy with their work and recommend them highly. Clare Hall and The Mercato are truly jewels in the Brescia crown.

Sincerely,

A handwritten signature in black ink, appearing to read 'S Blagrove', with a stylized flourish at the end.

Sheila Blagrove
