To Whom It May Concern,

As the project architect for the Western SEIB project, I am pleased to provide this letter of recommendation in support of Hayman Construction as an exceptional General Contractor for other projects.

Hayman Construction delivered a high level of workmanship and demonstrated strong attention to detail throughout construction. Design intent was well respected, and coordination on site allowed architectural elements to be executed to a high standard.

The quality of the completed facility was evident at the project's grand opening. The finished space presented extremely well and reflected the collaborative effort between the design and construction teams.

I was very pleased with the outcome of the Western SEIB project and would welcome the opportunity to work with Hayman Construction again in the future.

Sincerely,

David D'Andrea,
OAA, LEED AP BD+C
Senior Project Architect
